

PraxiLabel™

Semi-automated syringe labeller

“Fast, accurate and repeatable.
Syringe labelling made easy!”

PraxiLabel™ is a semi-automatic tabletop syringe labeler intended to increase labeling productivity as it eliminates the work related injuries due to frequent hand and wrist movements involved in the syringe labeling operation.

The labels are pregraduated and may be printed on any heat transfer label printer.

PraxiLabel™ is designed for use with the 3cc, 5cc, 10cc, 20cc and 50cc syringe sizes and labels from MedXL.

Only one set of 2 way snap-in syringe support rollers covers all syringe sizes (no tools needed for the change).

The PraxiLabel™ should be used in conjunction with the PraxiFill™ for labeling the prefilled syringes.

Increases productivity

Saves time and money

Reduces repetitive motion injuries

Features & Benefits

- ✓ Can label 3cc, 5cc, 10cc, 20cc and 50cc syringes.
- ✓ Simple and fast change over between different sizes
- ✓ Adjustable label position for accurate labelling
